

Bayesian next-2w invasion probability with 90% credible intervals

Bayes-M10-med – radiation-composite · med GT

Province Bas-Uele Haut-Uele Ituri Nord-Kivu Tshopo

Point = posterior mean; bar = 90% credible interval. Per-model bands are the true posterior 90% CrI; the stacked band averages member quantiles and therefore UNDERESTIMATES the true 90% CrI.
